

Workshop on Time Series Analysis and Statistical Disclosure Control Methods for Official Statistics

CALL FOR PAPERS

December 5-6, 2024 – OECD, Headquarters (Paris), France

INSEE and the OECD are organizing a workshop on both time series analysis and statistical disclosure control methods for official statistics.

This workshop offers an opportunity for official statisticians, academics and researchers in economics and statistics to discuss policy applications emerging from new state-of-the-art analytical tools and techniques.

This year's workshop topic sessions include (but are not limited to), the following:

- **Time Series Analysis**
 - Seasonal adjustment
 - Nowcasting
 - Trend Cycle estimation and Turning point detection
 - Using new features of JDemetra version 3 and rjdverse R packages
 - Experiences in statistical offices, central banks and other institutions
- **Statistical Disclosure Control (SDC)**
 - SDC applied to time series
 - SDC Methods/Tools for tabular data
 - SDC Methods/Tools for microdata
 - SDC Methods/Tools for output checking
 - Risk Utility trade-off in official statistics
 - Experiences in statistical offices, central banks and other institutions.

Please send your abstract (maximum 2 pages long) to anna.smyk@insee.fr and emmanuelle.guidetti@oecd.org before **September 15th 2024**.

The workshop will be hybrid (in presence and remote). Participation is free but **registration is compulsory**. For further information, please contact virginie.elgrably@oecd.org or consult the OECD community page:

<https://one-communities.oecd.org/community/workshop-on-time-series-methods-for-official-statistics/SitePages/Home.aspx>

Key deadlines:

Abstract submission	15/09/2024
Notification of abstract acceptance	11/10/2024
Opening registration	15/11/2024
End of registration	04/12/2024
Paper submission	From 15/10/2024
Workshop	5 and 6/12/2024
